Text 1

Today I go to the market. I need to make a list. It's easier and you don't buy too much. I need some vegetables. I need some fruits, too. I want to buy pasta and I want to buy rice. I think I need meat and I need eggs. And I want to buy some sausages. I also want to buy milk and cream. And what else do I need. I think that's all. I think that's all. That will be expensive enough. Yeah, that's all. So I will buy the things on my list. That's a good idea.

Text 2

Today we are at the market. We need to buy some food. We would like to buy some nuts. Those nuts cost twenty pesos two-hundred fifty gram. We also want to buy some cereals. These cereals cost 25 pesos 250 gram. We also would like to buy a mixture of nuts. These nuts cost 10 pesos for a hundred gram. They also have dried fruits, for example dried apricots or dried prunes. They cost about 25 pesos a hundred gram. This place looks really beautiful with a huge variety of food.

Text 3

Today I'm at the market. I want to buy some fruits. I will buy my fruits here because it looks like a nice place to buy my fruits. We have bananas, they cost twenty pesos a kilo, we also have melons, they cost around ten pesos one piece. We also would like some pears. The pears look really delicious. They cost about twenty-six pesos the kilo. And.. maybe I will buy some pineapples. The pineapples look really nice. They cost fifteen pesos a piece. And maybe...what..I really would like today is a papaya. The papaya costs fifteen pesos a piece.

Today I'm at the market. I need to buy vegetables. I will buy my vegetables here at the place. It looks really nice. I will buy some tomatoes. Tomato is ten pesos a kilo. Also I will buy some zucchini. Zucchini costs 15 pesos a kilo. I also would like to buy some cauliflower. Cauliflower costs five pesos a piece. And what about some cucumbers? I'd like to buy some cucumbers. Cucumbers cost 15 pesos a kilo. I think that is all. How much will this be?

Text 5

Today I need fruits and vegetables. I would like bananas and I would like mangoes. I also would like melons and I would like water melon, too. I would like apples and I would like papaya. I also would like grapes and that's all. How much may that be? I believe, it costs about five Euro. That's not expensive, this is very low priced.

Text 6

We have bought cheese at the market and vegetables. This is very low-priced to buy at markets in Mexico. For example the cheese costs converted two Euro. For example here a Parmesan from Uruguay or here a soft cheese from Chiapas. Tomatoes cost about 60 Cent the kilogram. Cucumbers cost about 80 Cents. Carrots cost about 60 Cents. Onions are very cheap, too. Onions cost about 40 Cent the kilo. This means in total one pays about five to six Euros for cheese and vegetables.
