

I'm sick

texts

Text 1

I feel really ill. I got a really, really, bad, bad cold. I think I wasn't dressed properly. It is very cold and very wet at the moment and I probably should dress better. So now I got high fever, a blocked nose, a huge headache and a sore throat. I'm shivering all day long. I went to the doctor yesterday and he gave me some pills, but they don't work really. He also told me to drink hot tea and to stay in bed, but it doesn't help really. I still feel really bad and really tired. But maybe I just need to stay just in bed until tomorrow or the day after tomorrow. We shall see. It will be better. Maybe in a few days.

Text 2

I'm really sick. I got a cold. I got a really, really bad sore throat and a huge headache. I really, really feel bad. I got a lot of pain. I got a blocked nose and my tommy feels really bad. I really feel sick. I can't eat. I'm not hungry. I should go to the doctor, but I can't be bothered to get up and leave the house. I just feel too bad, just feel too sick. I should take some pills maybe, take some medication, but I just feel lazy and tired and...sick. I just will sleep a bit and hopefully tomorrow I will be better because I need to go back to work.

Text 3

Grandfather is very sick. He doesn't feel well. He has a high fever. He has a headache. His stomach aches. And he has diarrhea. He has a very, very, very strong cold. His fever is very high. He takes pills against his headache but they don't help much. He needs a thermometer. But he doesn't have a thermometer. But it is enough to touch his forehead to know that he has high fever. He doesn't want to go to a doctor, like most of the men never want to go to the doctor. He says that he just has to relax and recover and has to drink a lot of tea. That will help him. Let's hope for the best. We shall see.

Text 4

My father is sick. He doesn't feel well. He has fever, a headache, diarrhea, but he doesn't want to go to the doctor. He has been ill since last weekend. So he has been ill for six days now. But he doesn't want to go to see a doctor. He is so stubborn. It is always the same. He was too much time outside in the rain and he got too wet and afterwards he didn't take a hot shower. And now he got a strong, strong cold. But he doesn't want to listen and go to the doctor. It is always the same with him. But well, what shall I do. Let's wish him that he will be better soon. That's all we can do.

Text 5

That's my brother. My brother has to stay in bed. Why? Because they operated him. He had a problem with his knee. So they operated his knee. He's well now. It is just that he can't walk and can't run. So he has to stay in bed. He has to take a lot of painkillers because an operation in an articulation of your body is quite painful. He has to stay in bed for the next 4 to 6 weeks, but it is not that bad. He got a lot of visits by his friends and a lot of presents as well, because everyone feels like 'the poor kid needs to be animated a bit', so they bring him chocolate and presents and all that stuff. So it's not too bad. He will be better soon.
