

against and in favor of

texts

Text 1

I like going to the markets on Sunday. It is very nice. I am totally in favor of going to the market and I am totally in favor of supporting the people who work at the market. I don't like to go to the big malls because I'm totally against those big malls. They are just big malls, wanting you to consume. And I think it's not good just to give your money to big corporations. I'm totally against giving my money to big corporations. I'm totally in favor of spending my money in small shops, local shops. I think we all should try to spend our money in small shops, give it to our people, around us, our neighbors, our friends and not to multinational enterprises having hundreds of shops and just not supporting local culture and local businesses.

Text 2

I'm against smoking. Smoking is dangerous I think. I also think that smoking kills. Smoking harms your health. Smoking also harms the people around you. In my opinion it is very, very unhealthy and you definitely should stop smoking. I smoked once myself and I decided that I should stop smoking and I did it. Today I'm totally against smoking and I'm in favor of harsher regulations, more help for the people who are smoking and a general prohibition in public spaces. I'm totally against people smoking in bars. I think that mustn't be and shouldn't be. And I'm totally against people smoking generally in public spaces because they are risking not only their health but also my health because I'm close and I'm inhaling their smoke. That's why I'm against smoking.
